

DESIGNER: Nathan Gabor, Gabor Design Build, LLC

Gabor Design Build doesn't just remodel a room for you, we will change the way you feel every time you step into it. We recently gave new life to this 1926 home, residing along Milwaukee's notorious Lake Drive, with an impressive, whole house renovation. The kitchen and living room underwent the largest transformations...they traded spaces! Kitchen features include Custom White Inset Cabinetry by BURMEISTER WOODWORK CO., top of the line appliances, polished quartzite countertops and a barrel vault beverage area. The application within the barrel vault astonishes...it's hand carved, Tuscan stone plaster. Boasting a timeless, old world, wine cellar-like feel, it fools the most astute professional into believing it's real stone. Our mission, our life's work, is to create functional, beautiful, multi-generational residential spaces. Based on solid design and quality to fall within budget, Gabor Design Build makes our clients happier than they ever thought they could be.
